

**MONTGOMERY COUNTY
SHERIFF'S OFFICE
THE WOODLANDS TOWNSHIP
SPECIAL REPORT**

SHERIFF RAND HENDERSON

BY: CAPTAIN TIM HOLIFIELD

MONTGOMERY COUNTY SHERIFF'S OFFICE

During a December 2018 Meeting, it was requested that a presentation be provided by the Sheriff on Accidents.

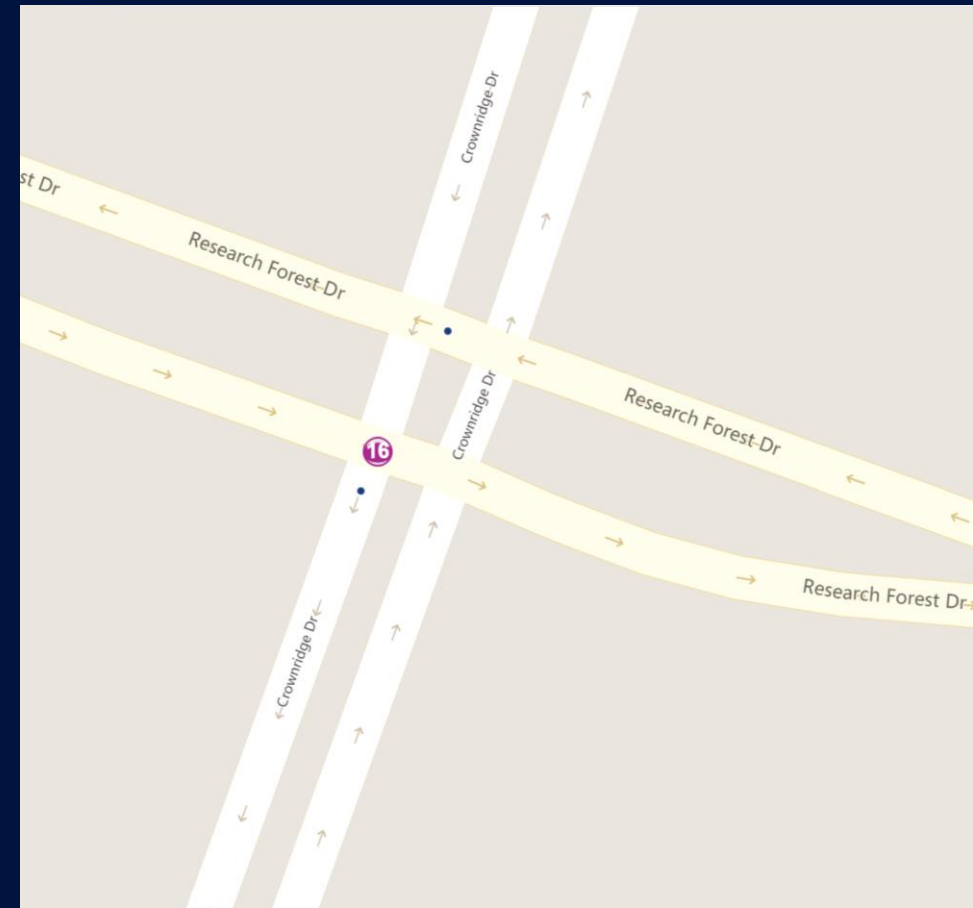

One of the biggest challenges to commuters are those who are in such a hurry, or feel as though they cannot wait for a safe time to proceed that they take unnecessary risks, and many result in crashes.

I have personally examined the reported crash accidents that occurred at the intersection of Crownridge Dr. and Research Foreest Dr. During 2018, deputies conducted accident investigations for 18 crashes at that intersection, roughly 1.5 a month.

In every instance, one party either disregarded the traffic control device, or did not proceed with caution on a flashing yellow light, pulling into the path of an oncoming vehicle.

The likely cause for most of these crashes is the lack of patient driving and failure to yield right of way.

The following map represents all crashes that occurred at an intersecting street in The Woodlands Township, where the accident was investigated by a law enforcement officer.
