

**Participants will learn:**

- *What you can do to conserve and protect water, and help others to take action*
- *How watersheds function*
- *Why preserving watershed quality matters*
- *Ways to earn Certification as a Texas Parks & Wildlife "Texas Waters Specialist"*
- *How to get involved in your community*

Several training classes will be offered during 2020 to prepare you to volunteer in a wide variety of opportunities such as teaching students about aquatic habitat in field studies, conducting water quality testing in a nearby waterway, making presentations to local civic and social groups, and more. Volunteer projects are in development and will be offered as they are confirmed.
