—OR—

I pledge to use pesticides only occasionally and when I do, I:

- identify the pest before taking action;
- use less toxic treatments such as horticultural oil or insecticidal soap;
- always follow label directions;
- never spray plants in bloom; and
- only target-spray the problem spots.

Home Composting

While not a requirement for the registry, composting organic waste from your kitchen and yard is highly recommended. By doing so, you reduce the amount of waste destined for landfills and are rewarded with rich compost to add to your landscape. Your soil and plants will thank you. You can learn more about composting at a Composting Class offered by Environmental Services throughout the year.
